

Build Homes and Profits with BuildSoft

INTRODUCTION

“BuildSoft has paid for itself many times over just in savings that would have been paid to accountants. As a result of using BuildSoft, we save over \$3000 a year in accounting fees alone!”

Roger Macon
Paradise Homes Inc.
Lithonia, GA

“BuildSoft home builder software is a tightly integrated system with all the core processes we need, all packaged in a manageable way. I really think that the person who designed BuildSoft is a genius.”

Todd Wacome
Wynwood Associates
Andover, MA

You’re a builder, not an accountant. Why should you have to struggle with a complex, limited accounting-based software that requires a lot of work and doesn’t meet all your needs?

BuildSoft does everything you need in a single integrated package. Developed by a builder for builders, it makes your job easier so you work more efficiently, save money and increase profits. BuildSoft goes above and beyond standard accounting software. Use all four integrated components together, and you won’t believe how quickly you will boost the efficiency of your projects.

BuildSoft is the leading software application for small to medium-sized homebuilders and remodelers, and is used by nearly 2000 companies across North America.

With BuildSoft you will finish your jobs on schedule and make each job more profitable.

PRODUCT OVERVIEW

Estimating: Make Money on Every Job

Price your jobs with confidence to ensure you make money on every job. Using previous job history, create accurate estimates, generate preliminary budgets, and gauge subcontractor and vendor bids with very little time and effort. With clear information, you can see the big picture and maintain the upper hand in the estimating process and in negotiations with vendors and sub contractors.

Accounting: Designed for Homebuilders

You don’t have to be an accountant to

use BuildSoft; with simple setup and automated entries keep your books balanced and your projects organized. Entries are automated so you don’t have to remember your debits from credits, and the system comes equipped with the standard NAHB Chart of Accounts to save you days of setup time. Industry specific tools allow you to stay on top of subcontractors’ workers comp insurance. Take full advantage of BuildSoft by keeping your Purchase Orders and Work Orders organized within a structured system that produces, schedules and generates change and variance orders as needed.

Project Management: Keep Jobs on Track

At the heart of BuildSoft is a complete Scheduling tool to let you be proactive and stay on top of your jobs. Display your entire job at a glance, automatically update your calendar with daily reminders, and ensure your projects always stay on track. Make changes to the schedule with the click

of a mouse, and the powerful integration automatically updates all associated events (such as calendar tasks and POs). Changes are easy to manage. Simply adjust the schedule and the changes will ripple through the system, updating your calendar, purchase orders, work orders and more.

“Anyone who wants to simplify, improve, become more efficient and financially benefit from residential construction should seriously consider BuildSoft.”

Roger Macon
Paradise Homes Inc.
Lithonia, GA

“Before BuildSoft, our profitability was at about 9%. Using the software gave us real insight into where we needed to make changes. Now our profitability is up to 15%. The 6% it added to our bottom line has paid for the initial cost of BuildSoft many times over!”

Kittie Sallee
Sallee Custom Homes
Weatherford, TX

Job costing: Stick to the Budget

Easy-to-understand job cost reporting helps you stay aware of where your costs are relative to your budget. Unlike generic accounting software, you can finally analyze costs on a per-home basis. The system makes it easy to monitor variances and changes so you can closely monitor vendor performance.

ABOUT US

Support:

BuildSoft is supported by a team that knows about your business. Find reassurance in getting unlimited support by experts in construction and accounting. The on-line client care center provides 24/7 access to product updates, the product knowledge base, training materials, and more.

Training:

In addition to your initial training, we offer free refresher courses every month to keep your team on top of their game. When you hire new staff, have them attend all of our free courses to get them to work immediately.

Solid Backing:

BuildSoft is operated by Constellation Homebuilder Systems, the largest software company exclusively dedicated to the homebuilding industry. With our experience and dedication, you have the confidence of knowing that BuildSoft construction software will continue to be supported and enhanced, providing you with an industry-leading solution for years to come.
